PROFESSIONAL SUMMARY

At the core, I'm a **natural problem solver** — someone who looks at a broken process and immediately starts thinking about how to fix it. That instinct is what led me into AI automation. With 9+ years of remote work experience across lead generation, executive support, and social media, I kept finding the same problem: **businesses drowning in manual, repetitive work**. Now I build the systems that eliminate it.

Proficient in **Zapier, Make (Integromat), n8n, and GoHighLevel (GHL)**, I design automated workflows that connect CRMs, trigger lead follow-ups, route qualified prospects, sync data across platforms, and cut hours of manual work down to zero. I don't just identify the problem — I build the solution, test it, and hand it off running.
